Wheelarcs again

Послан boja - 18.05.2011 04:11

Months ago I posted here about a frustrating part of a BMW Z4 front fender. I found hard to build that part accordingly to a Chinese tutorial by one of Rhino Masters DIXON.

Now, after mine and thousands request, he kindly updated that part of tut making it avalaible for free here: http://blog.shaper3d.cn/?p=2010

Hope I did a good thing.

See ya. http://www.kodg-3d.com/images/fbfiles/images/perpective-20110518.jpg
